

# IPG Evopallet Visual Guide to Safe Handling and Best Practices

## Handling with Pallet Trucks, Forklifts and AGVs

For complete pallet lifting, the forks should be inserted to the full usable depth of the pallet, until complete support is achieved, and kept in a horizontal and parallel position to the base.

When lifting IPG Evopallet for repositioning, the forks should be inserted from the short side to a depth of at least 10 cm to prevent deformation of the top deck.

The pallet should not be pushed by applying force to the runners with forklift forks or other mechanical equipment, as this may result in structural deformation.

## Additional information

Suitable for outdoor storage as it withstands all weather conditions and temperatures ranging from -50° to +300°.

Always wear appropriate personal protective equipment (PPE) during handling operations.

Do not lift the pallet from one side only or with unbalanced loads.

## IPG Evopallet Load Capacities – Summary

LOAD CAPACITY	STATIC	STATIC (even load)	DYNAMIC	RACKING
Evopallet BASIC	2000 kg	4000 kg	1500 kg	1000 kg
Evopallet PRO	2500 kg	5000 kg	1750 kg	1750 kg
Evopallet PLUS	2500 kg	6000 kg	2000 kg	2000 kg

# Master the IPG Evopallet® with Ease

*With decades of experience in the logistics industry, we know how crucial proper handling is for efficiency and safety. The IPG Evopallet® user guide provides clear, step-by-step instructions to ensure your teams can handle and operate the pallet correctly, maximizing both performance and longevity.*

*Always wear appropriate personal protective equipment (PPE) during handling operations to maintain the highest standards of workplace safety.*

*Our team is ready to provide detailed support and tailored presentations to help you fully understand the benefits and correct use of IPG Evopallet®. By following the guide, your warehouse and logistics operations can run smoother, safer, and more effectively.*
